TEAM IN ACTIONS

The Safety, Security & First Aid Training

To strengthen workplace safety, security awareness, and emergency preparedness, a 4-day Safety, Security & First Aid Training was conducted from 26–29 July 2026. The training brought together 28 participants, including 25 Security Guards, 1 Technical Operations staff member, and 2 Customer Service staff members.

OBJECTIVE OF THE TRAINING

- Safety: Identify workplace hazards, implement risk control measures, and adhere to emergency evacuation and safety protocols.
- Security: Safeguard sensitive company and client data while securing physical assets and infrastructure.
- First Aid: Provide basic life support (CPR) and respond promptly to both minor office incidents and critical site injuries (shocks, burns, and bleeding).

The training focused on workplace safety, security, and first aid preparedness. Participants learned to identify hazards, manage risks, and follow emergency procedures, while also strengthening their awareness of protecting company information, client data, and physical assets. They also gained basic CPR skills and learned how to respond to common emergencies such as burns, bleeding, and shock.
